Speaker:

Hemal Bharadva is the Director of Engineering and Operations at aviationscouts GmbH, where he oversees logistics, inventory management, technical procurement, and project delivery.

With a bachelor's degree in Aerospace Engineering from the Polytechnic University of Turin and a master's degree in Aviation from FH JOANNEUM, Hemal's expertise bridges both theoretical and practical domains.

Having lived in Kenya, Italy, Austria, and Germany, Hemal embodies a rich cultural tapestry that informs his leadership style and global outlook. When he's not spearheading aviation projects, you'll find him exploring the world, sampling diverse cuisines, catching live music, or cycling toward his next adventure.

Topic:

This talk explores the hidden career opportunities within the aviation aftermarket—lesser-known roles that can lead to dynamic and rewarding career paths. From managing complex retrofit projects to navigating the unique challenges of the industry, the session highlights practical insights and real-world lessons about this often-overlooked sector. With relatable stories and practical takeaways, the aim is to inspire students to think beyond the obvious, embrace curiosity, and consider the untapped potential the aviation aftermarket holds.
