Master degree programme
IT LAW & MANAGEMENT

IT LAW > E-BUSINESS & E-GOVERNMENT > IT GOVERNANCE > IT STANDARDS > CYBERCRIME > SERVICE LEVEL AGREEMENT > DATA PROTECTION

The part-time master degree programme forms the interface between IT, law and management. IT experts are increasingly confronted with questions of legal status in terms of contract law, software licences, data protection, online sales and e-commerce.

The programme offers students a comprehensive education in the fields of e-business, commercial law and IT law, data protection regulations, media and telecommunications law and IT project management.

The programme is designed to allow students to combine career and family: around 60% of the course is completed via e-learning, and students need only be present on campus on one weekend per month.

"The master degree programme is the perfect addition to my existing IT knowledge. The legal aspects behind information technology are well explained and presented in an interesting manner. Practical case studies and student involvement in the lectures and exercises make learning law easy. This programme is the best way for engineers to become acquainted with material that would otherwise be entirely foreign to them."

Susanne Brandstätter, BSc, MSc, Graduate

FACTS
· Master of Arts in Business (MA)
· Part-time
· 4 semesters / 120 ECTS
· 20 places per year
· Language of instruction: German
· Head of Degree Programme:
  FH-Prof. Mag. Dr. Sonja Gögele, MBA MSc
· FH JOANNEUM Kapfenberg

CAREER PROSPECTS

Our graduates deal with problems and legal issues arising from the use of information and communication technologies. The range of potential careers is wide, covering IT and law as well as management.

"The special feature of this IT course is its consistent focus on the interplay between technology and business. And as a mother with a son, I am able to confirm that family life and study really are compatible."

DI (FH) Birgit Reinhofer-Mitterer, MA, Graduate
